FIT PM12 twelve-channel test campaign

FIT hardware acceptance bench

November 13, 2026

1 Scope and recorded coverage

Board PM12-K7-3A17A1B402212223. Campaign 5ef2e2b4-c04a-4fad-b86f-a23be621d7a7.

Recorded status: INCOMPLETE. Missing tests are NOT MEASURED. Complete selected-protocol coverage is not a calibrated whole-board release.

Channel	cfd-monitor	cfd-dacs	gate-phase	tdc	adc-dc	adc-lines	integrator
1	NM	NM	NM	NM	NM	NM	NM
2	NM	NM	NM	NM	NM	NM	NM
3	NM	NM	NM	NM	NM	NM	NM
4	NM	NM	NM	NM	NM	NM	NM
5	NM	NM	NM	NM	NM	NM	NM
6	NM	NM	NM	NM	NM	NM	NM
7	NM	NM	NM	NM	NM	NM	NM
8	NM	NM	NM	NM	NM	NM	NM
9	NM	NM	NM	NM	NM	NM	NM
10	NM	NM	NM	NM	NM	NM	NM
11	NM	NM	NM	NM	NM	NM	NM
12	NM	NM	NM	NM	NM	NM	NM

NM = not measured; INC = incomplete; ERR = acquisition error. No missing series is invented.

1.1 Board-level tests

Test	Status
Boundary scan and CPLD–FPGA connections	NOT_MEASURED
MCU, CPU–FPGA communication and peripheral IDs	NOT_MEASURED
I2C sensors, currents and voltages	NOT_MEASURED
HDMI digital link	NOT_MEASURED
Ethernet/bridge diagnostic	NOT_MEASURED

2 Fitted batches and fixture provenance

No fitted group has been declared yet.

Fixture labels CFD01–CFD04 are provisional bench labels. Factory identities and photos remain unknown until supplied; a label is not proof of module identity. Declared cable routes must be checked physically.

Raw inputs and selected result IDs are retained in inputs/. Repeated measurements are never silently substituted.

3 Retained attempts and explicit selection

No tests have been recorded yet.

All attempts, including failures and rejected repeats, remain in the archived inputs. The coverage matrix uses only the explicitly selected attempt.

4 Measurements and common channel plots

No live channel data have been imported. This is a coverage scaffold, not a measured report.
